PROFESSIONAL WORK EXPERIENCE

Material Handler, Amazon Robotics (Full Time, In Person) (**Aug 2026 - Present**)

- **Warehousing:** Utilized power tools, perform refills for assembly line stations, and perform transactions through the company bookkeeping system.
- **Safety:** Demonstrated safe working principles and wearing PPE.

AI Trainer, DataAnnotation (Contract based, Remote) (**Jun 2026 - Present**)

- **Prompt Engineering:** Formulate complex, adversarial prompts (red-teaming) to test AI constraints and factual consistency.
- **Technical Writing:** Author detailed justifications explaining rating decisions.

Controls Engineer (Summer Internship), Abbott Laboratories, (Full Time, In Person) (**May 2024 - Aug 2024**)

- **Quality Management:** Supported sterile manufacturing of COVID-19 test kits using Ladder Logic: Allen-Bradley PLC systems and RSLogix Software.
- **Leadership:** Led daily operations meetings for a 15-person team during a key staff absence.
- **Quality & Analysis:** Solved CAPA Actions.
- **Process Engineering:** Wrote technical guides for operating and installing devices.

EDUCATION

M.Sc. Computer Science – University of Southern Maine (**Dec 2024 - Jun 2027**)

B.S. Computer Science, University of Southern Maine, President's Scholar G.P.A. 3.44 (**Aug 2022 - Dec 2025**)

Camden Military Academy, Valedictorian G.P.A. 4.75 (**Aug 2018 - Jun 2022**)

Boston Public Schools K-8 (**2006 - 2018**)

SOME TECHNICAL KNOWLEDGE

Languages: Python, Java, C, C++, C#, JavaScript, Julia, GDScript, SQL, Bash, Assembly (x86), CSS, HTML.

Frameworks/Libraries: React, Node.JS, PyTorch, Scikit-Learn, OpenCV, Tensorflow, Pygame, WebGL2.

Embedded & Hardware: Ladder Logic, Arduino, Raspberry Pi, UART, Analog Signal Processing, UEFI Bootloader, BIOS, Cognex.

Cybersecurity & Networking: Wireshark, GDB, Ghidra, Can-Utills, PuTTY, picocom, CLI.

Tools & Platforms: Git (GitHub/Bitbucket), Jira, VSCode, Docker (Vocto), Agile Scrum

AI & Data: JSON, XML, ChatGPT, Claude, DeepSeek, Gemini.

Design & Media: Unity, Godot, SketchUp, Photoshop, GIMP, Audacity.

Digital Forensics: OSFMount, WinHex, Autopsy, FTK Imager, SIFT WS, RegistryExplorer, PhotoRecSorter, ShadowExplorer, Arsenal Image Mounter, KAPE

Agile Methodology: SCRUM Master

PROJECTS, CLASSES

Computer Graphics - WebGL2, JavaScript <https://github.com/d-man7562/cos452-dmancuso> (Fall 2026)

Advanced Machine Learning - <https://github.com/d-man7562/cos475-advancedmachinelearning> (Fall 2026)

MCUs - Various introductory kits and DIY for the Arduino and Raspberry Pi

Programming a keyboard in C -

<https://github.com/d-man7562/inline-mk47-keyboard-add-character-functionality> (Winter 2025)

Letter or number to Morse code audio - <https://github.com/d-man7562/detect-Key>

Digital Forensics (Summer 2026)

Computer Algorithms (Spring 2026)

Robotics - Programmed and Mathematically Evaluated Forward and Inverse Kinematics and Path Planning of a Microbot TeachMover robot arm using Linear Algebra and C++ (Spring 2026)

SCRUM Master - Led team of 5 for full-stack development using the Agile SCRUM Methodology (Fall 2025)

AI Mental Health Model (Python) - SCRUM Master for team of 3 to find efficient predictive models (Fall 2025)

Computer Vision - Wrote data loader in Python. Annotated 2000 images for CV test.

<http://github.com/d-man7562/dataloader/tree/main> (Fall 2025)

HELIMEHT Multiplayer Game - 2D top-down, tile-based shooter written in Pygame

<https://github.com/d-man7562/multiplayer-game-server> (Fall 2025)

CyberAuto Challenge - Cyber security CTF 1st place; historic Ghidra achievement in reverse engineering (**July 2025**)

Sisyphus Rising! - 2D top-down, infinite runner game using the Godot engine and written in GDScript <https://github.com/d-man7562/SisyphusRising> (**Spring 2024**)

Custom PC Builds

VOLUNTEER EXPERIENCE

- **Sutherland Pipe Band** - Bagpiper (**2021-Present**)
- **American Legion Post 156 Band** - Tuba, Snare, Bass drum (**2020-Present**)
